

STREAMER S210E

The **STREAMER S210E** from **IMPACTS** is the first mobile blast machine in the world, using the new developed „Inline Separation system“. This allows a 100 % increase of the blasting capacity compared to the existing machines working on single phase 230V A.C.

The compact and very robust machine is easy to handle and can be used in small areas, that are difficult to reach. The **STREAMER S210** has been specially developed to shotblast small to medium areas on concrete and asphalt as well as small steel areas. Main applications: walk ways, garages, pedestrian areas, basements, stairs etc.

In order to reach the optimal blasting capacity, it is recommended to use the **Streamers S210E** together with the **IMPACTS** dust collector series **DUSTCOM 3003**.

FEATURES

- Inline-Separation
- Height adjustable lever, with integrated control elements
- Extremely easy handling

SPECIFICATION

Model	S210E
Blasting power	2,4 kW
Travel	Manuell
Power supply	230 V/50 Hz, 16 A delay fuse
Working Width	210 mm
Blasting capacity	Up to 40 m ² /h on concrete
Lmin,Lmax x B x Hmin,Hmax in mm	895,1045 X 295 X 795,1030
Weight	50 kg
